20	About Highdream/KW.TW

In any job, it feels good to know there's someone reliable by your side. Someone you can depend on, even in busy situations. Someone who knows your requirements and how to meet them. Someone who gives you the right information at all times. Someone who takes the load off you instead of standing in your way.

That's exactly the kind of product we had in mind when developing our KW-6G series retail scales. Although they have different special skills, they share the same spirit of usability, efficiency and performance. Also their pleasant design makes sure that you or your staff will enjoy working with them, even if you see them for eight hours every working day.

The Highdream commercial series is great for a variety of retail applications, providing the perfect weighing solution for leading food retailers – whether it is a supermarket, farmers market, butcher shop, bakery shop, seafood shop, confectionery shop, buffet, salad bar...

The following pages will give you a closer look and, who knows, maybe you'll make new friends!

Four types, one goal: your satisfaction. Thanks to a diverse product line-up, we can offer the right solution for a wide range of retail applications.

#### Counter top scales

Counter top scales are designed to be typically used in grocery stores and delis. Our scale features a compact and durable design, making it easy to install, move and use in a variety of settings.

#### Counter scales

Our counter scale is ideal for use in supermarkets' self-service areas and lower service counter applications. Equipped with a large, clear display, customers can easily read out the weight and price of the item being weighed.

#### Hanging scales

Our hanging scale saves counter space and promotes products to customers via its 10.1" or 12.1" display screen. The design is robust for demanding retail environments, as well as ergonomic for easy operation by staff.

#### PC platform scales

PC platform scales are specifically designed to handle industrial and retail environments. Thanks to their PC capabilities, they can collect and store product data in order to streamline operations and improve efficiency.

Reliable performance and a sophisticated design

The Highdream KW-6G series retail scales combine elegance with high performance. Thanks to a powerful 4-core ARM processor for faster operation and large flash memory for greater storage capacity, they meet the needs of your various daily sales scenarios.

Their resistive touchscreen is bright for a clearer display and can cope with complex applications such as wet and greasy environments, ensuring long life and stability. Automatic tilt compensation provides for accuracy at tilts of up to 4°, preventing potential sales losses caused by metering and weighing.

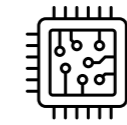

## Screen

The resistive touchscreen can be used even in wet and oily environments.

Its high brightness (500cd) and contrast enhance display sharpness, with a greater anti-interference ability of working processes.

The widescreen display provides a large view range, conveying information from multiple angles and ensuring a better user experience.

Because the full touchscreen displays items as images in a straightforward and easy manner, it can be operated by a wider range of people.

## Hardware

Up-to-date hardware combines large memory, excellent performance, high running speed and powerful data processing abilities.

The C/S architecture supports internet data transmission and backups, for easy and flexible use.

The embedded Linux operating system ensures smooth and steady operation.

## More features

Three modes: self-service/pricing/labeling are freely switchable, allowing for a wider range of applications.

Print output: the printing of receipts or labels is supported.

A workmate you can trust: the PlatMate counter top scale is compact and multi-functional, small and portable, integrating weighing, pricing, labeling and receipt printing. Compared with other scales, it saves more space, is easier to operate and more cost-effective. It helps you shorten customer waiting time, improve service efficiency and reduce personnel costs.

Compact design

- Bakery products

PlatMate

Easily applicable in various scenarios

A friend to stand by your side: equipped with dual LCD screens, the StandFriend counter scale can be widely used in modern fresh-food environments to solve the problem of low counters and space occupation. It can be easily applied in a variety of retail scenarios to assist your business. By optimizing configuration, reducing costs and improving efficiency, it provides a smart settlement method for bulk and bagged goods.

VertiPal

Because details matter: good design always has a reason.

It is our conviction that design, function and usability are like three inseparable partners. Only if they work together hand in hand will they achieve the best result for your business success. Just one example: our large color displays don't just look nice, but can also increase your profits through visually attractive on-screen promotions.

In other words: Highdream precision retail scales will get you one step closer to the smart supermarket. Here are some impressions of how attention to detail can serve the bigger picture.

#### Design & Performance

- Glossy, silver shape with an elegant, curved body
- Stable, embedded Linux system and large memory
- Hanging design in order to save counter space

#### Easy to use

- Easy-to-use operator interface and large display
- Water drop resistant touchscreen for easy operation with wet hands and fresh goods
- Screen viewing angle tilted at 5° for ergonomics

#### Efficient printing

- Embedded small receipt/label printer optional, suitable for a variety of scenarios
- Quick and easy roll replacement, 10-second quick roll change
- Reset button of receipt printer: simple reset with a single press after replacing the paper roll
- High-resolution, durable and efficient print head

#### Customer interaction

- High-performance and large-viewing-angle display for comfortable interaction
- 10.1/12.1" customer display with excellent visibility and legibility
- Supports dynamic advertisements, up-selling and cross-selling

#### Easy to clean

- Removable stainless steel weighing pan
- Integrated design for fast cleaning

# PC platform scale

Compact structure  
and function

PC as in “precisely correct”: the Highdream PC platform scale integrates functions of weighing, pricing, labeling and collecting purchase data, saving you a lot of time in the management and sales of fresh goods. Great for farmers markets, supermarkets and fresh produce shops, where a powerful purchase-and-delivery data system and accurate weighing are very important.

The durable and sturdy body, coupled with a high-end software system and powerful online functions, allows you to easily manage the incoming and outgoing data of various commodities in the warehouse. The fast weighing process can improve the efficiency of product storage and sales in the store, ensuring accuracy and reliability for supermarkets and warehouses. Waterproof IP66 design within 500mm of floor height (weighing pan), which can perform weighing operations in various harsh environments.

Our PC platform scale provides a high-precision sensor, and the weighing plate is waterproof, dust-proof and pressure-resistant.

Integrates weighing, pricing, labeling and printing

**Efficient work**

- Intuitive operation interface and 10.1" touchscreen
- Anti-dust, moisture and oil
- Adjustable brightness, suitable for indoor and outdoor scenes

**Strong and durable**

- The load-bearing underframe is made of die-cast aluminum alloy: waterproof, dustproof, pressure-resistant
- High-precision sensor, accurate weighing

**Easy to clean**

- Waterproof IP66 design within 500mm of floor height (weighing pan)
- The integrated design of the machine can be quickly wiped
- Convenient special-surface structure

**Efficient printing**

- Receipt/barcode printing mode is optional, suitable for various scenarios
- Operation switch is easy to handle, paper roll can be replaced in 10 seconds
- Durable and efficient print head
